Sociology and Social Research

CONTENT: Sociology and Social Research at the University of Cologne is a theory-driven, empirically oriented field of study. The programme therefore focuses not only on sociological theories but also on methods and statistics used in the social sciences. Keeping a close eye on requirements and changes in the world of work, it provides students with the necessary expertise, skills and methods to conduct research, judge research findings critically and take a responsible approach to their work.

FOCUS: Advanced tuition in data collection techniques, quantitative evaluation methods and statistics. Students will also gain a strong knowledge of how to plan, conduct and evaluate social science research projects.

INTERNATIONAL: Since most of our courses are delivered in English, you can apply and complete the master programme even if you have no knowledge of German. For our Master of Science in Sociology and Social Inequality, we have applications from a large number of different nationalities, which means you can be sure of an international and intercultural environment. We maintain cooperation with

more than 130 partner universities throughout the world, so it is easy for you to go a semester abroad. Another way to gain international experience on the programme is to take part in one of our study tours or other short programmes.

More information and offers at www.international.wiso.uni-koeln.de.

ONLY THE BEST FOR YOUR CAREER: The Master of Science Sociology and Social Research widens the knowledge gained in your bachelor studies, giving you advanced expertise in your chosen field. Possible areas of employment for sociologists can be found within market and opinion research, national and international statistic agencies, national and international associations concerned with social and economic policy, research institutions, media research departments within mass media corporations and personnel administration of corporations. Other opportunities present themselves in local government e.g. in departments responsible for school, family, urban or environmental policy, as well as provincial and federal agencies. Graduates possess skills that qualify them for senior civil posts in Germany and leading positions in social and market research as well as social planning.

PRACTICAL EXPERIENCE: As a student of the WiSo Faculty, you gain from an approach that is based on theory and methods, blend combining both research and teaching with practical elements. The teaching at our Faculty has benefited from many years of experience in working with companies and visiting lecturers from different professional fields. Many of the visiting lecturers are professionals and managers who bring important industry experience to the programmes, resulting in sector-specific, up-to-date programme content for our students. This ensures that the programmes reflect the real world and that they thus combine the practical and the theoretical, whilst also promoting knowledge-sharing between companies and you, the student.

The Master in Sociology and Social Research at Cologne University focuses on advanced methods of data collection and analysis - increasingly sought-after skills. Our approach is practice- and research-oriented and deals with current topics such as aging, the labour market, education, family, health, integration, crime and the economy.

Clemens Kroneberg, Professor, Institute for Sociology and Social Psychology (ISS)
